TRACK 07 · ED-01

SPIDER-VERSE EDITION

WITH GREAT GUIDANCE COMES GREAT OPPORTUNITY!

PATHWISE: AI CAREER NAVIGATOR

Swing through your skill gaps and build a personalized learning roadmap to launch your tech career with total confidence.

LEAD CREATOR
Lakshya Shekhawat

TARGET DOMAIN
EdTech & Future of Work

01. MISSION BRIEFING

NAVIGATING THE CAREER SPIDER-VERSE

EXECUTIVE SUMMARY

CHOICE PARALYSIS

Students swing blindfolded through thousands of online resources without clear direction.

SPIDER-SENSE HUD

Pathwise analyzes skill levels against real market expectations in real time.

TARGETED LEAP

Transforms static curricula into actionable weekly milestones tailored to availability.

02. THE VILLAIN

CAREER BLINDSPOTS FOR STUDENTS

UNCLEAR BENCHMARK EXPECTATIONS

Students study subjects like DBMS or C++ without knowing industry standards.

SELF-ASSESSMENT DISCONNECT

Difficulty gauging how academic grades translate into practical job readiness.

RIGID ONE-SIZE SCHEDULES

Generic courses ignore whether a learner has 5 or 15 hours available weekly.

82% OF ENGINEERING FRESHMEN

Report feeling completely unguided on how to transition from academic coursework to landed tech offers.

03. SPIDER-SENSE TECH

HOW PATHWISE POWERS UP LEARNERS

INTERACTIVE SKILL ENGINE

Calculates match percentage against target roles in real time.

SFIA & O*NET MAPPING

Uses verified global occupational taxonomies for skill profiling.

ADAPTIVE TIMELINES

Recalculates completion targets based on weekly available study hours.

04. CURRICULUM INTEGRATION

B.TECH CSE 1ST & 2ND YEAR SUBJECTS

YEAR 01

C / C++ FUNDAMENTALS

Pointers, memory management, and initial algorithms.

YEAR 02

DBMS & SQL ARCHITECTURE

Normalization, ACID transactions, and query tuning.

YEAR 02

OPERATING SYSTEMS

Process scheduling, memory paging, and concurrency.

READINESS ACCELERATION

3.5x

Faster transition from core coursework to internship readiness

05. TARGET DESTINATIONS

CAREER TRACKS ACCELERATED

SOFTWARE DEV (SDE-1)

Core algorithms, data structures, and system logic.

BACKEND ENGINEER

Relational databases, REST APIs, and microservices.

AI / ML ENGINEER

Python pipelines, neural networks, and model deployment.

06. PRODUCT INTERFACE

LIVE APP ARCHITECTURE

⚡ ZERO-LATENCY SINGLE PAGE

Lightweight, browser-native performance with local data saving.

🔒 PRIVACY-FIRST STORAGE

Client-side calculations keep student data strictly on-device.

LIVE APP WORKSPACE

AI-CAREER-NAVIGATOR.HTML

Complete student portal with skill mapping, dashboard analytics, and assistant.

```
Local File Deployment Ready
```

07. INTAKE & FEEDBACK

EMBEDDED RESPONSE HUB

CANDIDATE INTAKE FORM

Directly embedded Google Form survey for capturing student feedback and onboarding data.

Open Google Form ↗

DEVELOPER CONNECT

Lead Developer profile and professional updates.

Lakshya Shekhawat

linkedin.com/in/lakshya-shekhawat ↗

08. METHODOLOGY

3 STEPS FROM GOAL TO ACTION

1

SKILL AUDIT

Self-assess academic coursework and practical skills.

2

GAP ANALYSIS

Compare profile against target SFIA/O*NET job requirements.

3

ROADMAP EXECUTION

Execute weekly milestones fitted to study availability.

09. RESOURCE MATRIX

PROJECT ASSETS & LINKS

Asset Name	Resource Description	Access Location
Lead Developer	LinkedIn Profile & Professional Bio	Lakshya Shekhawat ↗
Live Web Application	Pathwise Single-Page Application	AI-Career-Navigator.html ↗
Feedback & Evaluation	Candidate Intake Google Form	Google Form Survey ↗

READY TO TAKE THE LEAP?

THANK YOU! QUESTIONS & DEMO

Small steps today. A stronger career tomorrow. Experience Pathwise live in your browser.
